# HTML 201 Takeaway

Pro Tips for Working with HTML
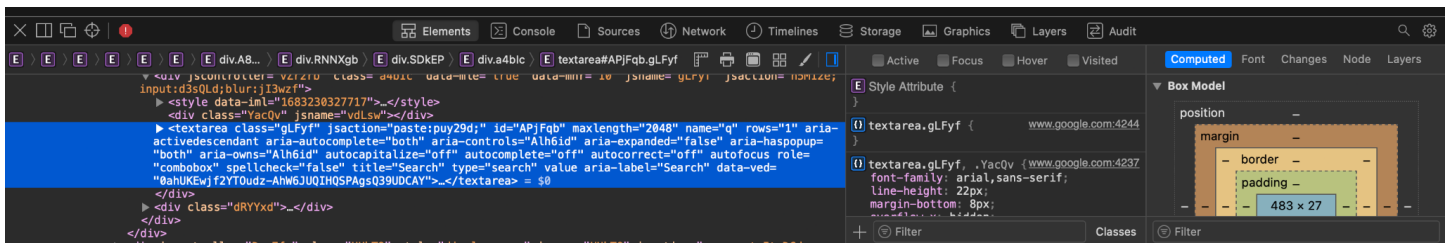

The Developer Console Safari Walkthrough

In Safari you have to enable developer options to access the developer console.
Safari > Preferences > Advanced
Check "Show Develop menu in menu bar"

Similar to Chrome you can now right click and choose "Inspect Element" to open the console window.

Select an element on the page using the element selector tool.

To view a web page on a mobile device open the Develop menu in the menu bar and select "Enter Responsive Design Mode"
