Add workflows to staff group

	Name	Workflow	When	Active		
☰	Set Is Staff	Set Is Staff Attribute	Member Added To Group	✔	✏	✖
☰	Unset Is Staff	Unset Is Staff Attribute	Member Removed From Group	✔	✏	✖

Group Member Workflows   ⌃

The workflow(s) that should be launched when group members are changed in this group.

Bulk update all members to have the value. Now you have a boolean field you can use in event registrations to conditionally show or hide additional fields.
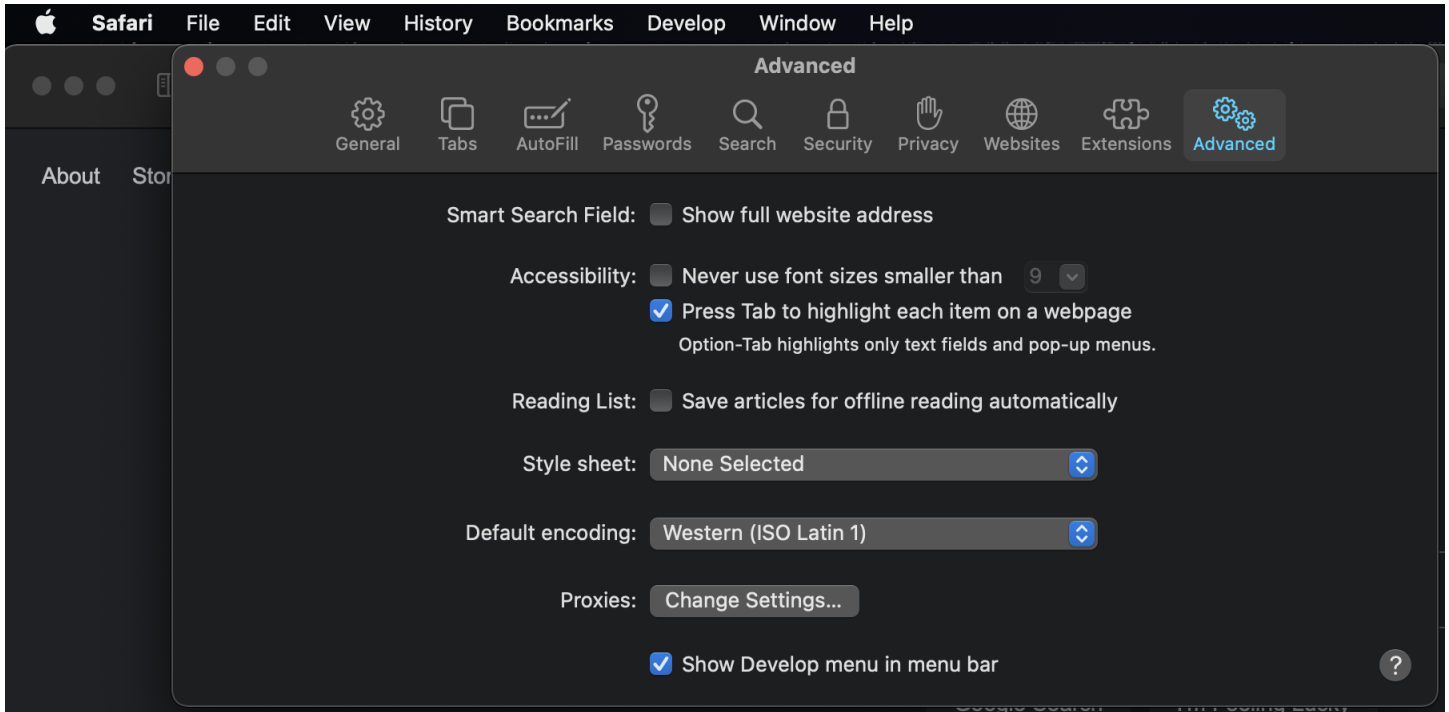

Pro Tips for Working with HTML
The Developer Console Safari Walkthrough
In Safari you have to enable developer options to access the developer console.
Safari > Preferences > Advanced
Check "Show Develop menu in menu bar"

Similar to Chrome you can now right click and choose "Inspect Element" to open the console window.

Select an element on the page using the element selector tool.

To view a web page on a mobile device open the Develop menu in the menu bar and select "Enter Responsive Design Mode"

Open Page With   >
User Agent   >

Courtney MBPro 13" 2017   >

Service Workers   >

Web Extension Background Pages   >

Experimental Features   >

Enter Responsive Design Mode   ^⌘R
